

Trusted by 200+ schools across the US

Every Pickup. Verified. Every Time.

Pickup Zone replaces paper lists and verbal confirmations with a secure, QR-based student release system — so only authorized guardians ever leave with your students.

THE PROBLEM

Traditional pickup systems put children at risk

Schools still rely on paper lists, verbal confirmation, and human memory — methods that are dangerously easy to exploit.

Unauthorized pickups

Non-custodial parents and strangers can exploit weak identity checks to take children without authorization.

Custody violations

Schools have no reliable way to enforce court-ordered custody arrangements during dismissal.

No audit trail

Paper logs and verbal records can't stand up to legal scrutiny or post-incident investigation.

OLD WAY

- ✗ Paper pickup lists at front desk
- ✗ Verbal confirmation by staff
- ✗ Security guard recognition
- ✗ Manual paper logs

VS

PICKUP ZONE

- ✓ Encrypted unique QR per guardian
- ✓ Real-time admin approval workflow
- ✓ Device-restricted scanning
- ✓ Full digital audit trail
- ✓ Instant QR revocation capability

— HOW IT WORKS

Six steps from arrival to safe release

A verified, multi-layer workflow that protects every student on every pickup.

01

Parent Enrollment

Parents register, add students, and assign up to 2 authorized guardians. The system generates a unique encrypted QR for each person.

02

Arrival at School

The parent or guardian arrives and presents their QR code — on a printed card, phone screen, or windshield tag.

03

Guard Scans QR

The security guard scans using a device locked to an approved IP address. The system instantly verifies identity and authorized students.

04

Admin Notified

A real-time notification reaches the school admin, showing guardian name, photo, student name, and timestamp.

05

Admin Approves

Admin approves the release with a single tap. The student is sent to the pickup zone and status is updated to "Released."

06

Guard Confirms Exit

Guard confirms the student entered the vehicle and exited campus. A full audit log entry is created and stored permanently.

— FEATURES

Everything a school needs. Nothing it doesn't.

Purpose-built for school dismissal — not a generic tool bolted onto a different use case.

Encrypted QR Codes

Every QR is token-encrypted, expiration-capable, and can be revoked instantly if a custody situation changes. No duplicate codes, ever.

Real-Time Approval

Admin gets a push notification the moment a QR is scanned. One-tap approve or deny — no phone tag with office staff.

Full Audit Trail

Every scan, approval, denial, and confirmation is logged with timestamps, device info, and user IDs — exportable to PDF or CSV.

Multi-Branch Support

Manage multiple campuses under one subscription. Each school operates in an isolated tenant environment with its own admin panel.

Unauthorized Attempt Alerts

Any unrecognized QR scan triggers an instant alert to the admin. Attempted pickups by revoked codes are flagged and logged automatically.

Guardian Management

Parents assign up to 2 guardians per student. Guardians receive their own unique QR and can only access their assigned students.

— WHO IT'S FOR

Five roles. One secure system.

Super Admin
Manages all schools, billing, subscriptions, and system-wide activity
[Pickup Zone](#)

School Admin
Approves pickups, manages students, monitors guards, exports logs
[Per school](#)

Parent
Registers students, assigns guardians, receives & downloads QR codes
[Self-serve](#)

Guardian
Receives assigned access and unique QR to pick up designated students
[Invited](#)

Security Guard
Scans QR codes via a secured, IP-restricted device at the gate
[On-site](#)

— PRICING

Simple, school-sized pricing

No hidden fees. Cancel anytime. All plans include onboarding support.

Basic
Perfect for small schools getting started with secure dismissal

\$99
per school / month

- ✓ Up to 200 students
- ✓ 2 security guard accounts
- ✓ Core QR verification
- ✓ Activity log & history
- ✓ Email notifications

— SECURITY & COMPLIANCE

Enterprise-grade security for the people who matter most.

HTTPS Everywhere
All connections use TLS 1.3. No unencrypted data ever leaves the server.

COPPA Compliant
Fully compliant with the Children's Online Privacy Protection Act.

End-to-end encryption

QR tokens are encrypted at generation and verified at scan. Data is encrypted at rest and in transit.

Device & IP restricted scanning

Guard scanning devices are registered and IP-locked. No unauthorized device can access the scan interface.

Role-based access control

Every user only sees and controls what their role permits. Admins can't access other schools. Guards can't modify records.

GDPR Ready

Data handling built for US and EU regulatory requirements.

Multi-Tenant Isolation

Each school's data is fully isolated. Zero cross-tenant data access.

Ready to secure your dismissal process?

Set up in under a day. No hardware required. Schools are live in hours, not weeks.
